人矿——Renmine

人矿是指读了 20 年的书，还 30 年房贷，养 20 年医院，我们从生下来就是被作为消耗品使用的人类。

如果叫我们国家的主人，有很多事情无法解释。如果叫**人矿**，那就全说得通了。

如果你也感觉无力的话，和我们一起创造一个现象级的行为艺术

合约地址（bep20）：0x416162b73cf0168a01c525cd3040d05f25ecf5a2

我们并不描绘一个自由、暴富的故事。

我们只是一群平凡的一级市场人，有人购买过 10 个 0 的屎币，有人售出过 3 个 0 的狗币，虚伪地拥护过巅峰 raca、dogeking、babydoge 等等等等，亦在黄昏的时候信仰着区块链始终是未来。

曾经"梭哈"一个词令我们血脉喷张，

如今我们发现在描绘自己白皮书的时候……
丰富却苍白……
丰富的是我们之中这些形形色色的众生，都是蓝图不可或缺的一块！
"人矿"皆为人人，人人皆为"人矿"
苍白的又是在众生信仰缺失的时代我们还能成功吗？成功的时候到底是一将功成万骨枯，还是君封王侯天下庆？
所幸……
我们最终把自己定位了这是一场行为艺术，艺术最美的样子是过程，这个过程我们尽自己最好的努力……

至于结局？
抱歉，我们并没有那么在意……
因为我来过，我还在，这就够了！

下面是我自己的心理话：

从一开始，我并不觉得这个项目会轻易的成功，也准备了花去一个月甚至一年的时间来表达我的内心反抗。

我并不反动，甚至我很爱国，只是最后我突然很苍白的思考，我生而为人，到底活出了什么意义，直到见到同事凌晨 4 点的时候猝死在工位上，我才停了下来……

我努力的考上了一所不错的大学，拿到了旁人羡慕的收入，可是背后的酸楚是每天不停的加班，到手的收入大半还着房贷车贷，小半赡养着父母家庭，月底年底捉襟见肘，当看到心酸的"人矿"二字，从好好上学长大了才能出息，到好好工作才能活出个人样，对比现实，我的世界观崩塌了。

那一刻，我很想写感想文，坐在电脑前，却又不知道如何描述，于是我的专业，让我觉得或许行为艺术的表达形式，不仅仅应该只是文字的诉说，也可以是代码的跳动。

但是我又迟疑了很久，如今糟糕的区块链市场，还能让我的代码闪耀吗？还有人相信中国人项目吗？

谁又说理工男不够感性，去他妈的，我表达的只是自己，何必在乎市场怎么样？

我很少抽烟，因为这不健康，但是那一刻我还是点了一根，或许用网络词汇叫做祭奠吧。

本来自诉写到这里，我就该停止，但是仅仅 24 小时后，我又想法又被一群可爱的人改变了，他们每个人都这么努力，或许不单单只是因为代币的价格吧？

奥……是我们都一样！为了生活忙忙碌碌，为了生活四处奔波。

真诚的聆听之后，我发现只是用代码敲出了他们的心声，他们又升华了我的灵魂……

如果这一次我能做点什么？

那么何不是一场轰轰烈烈的区块链革命？

以前我从来不敢想象自己假如会是一个万倍项目的发起人会怎样？

但是此刻我心潮澎湃的想说：这次我要做十万倍狂暴牛市的牵牛人又当如何！大丈夫当有所为。

关于人矿互助金融初期规划：

人矿互助金融主要是针对 Renmine 持币人设立救助基金会为主，每次由大户和营销钱包筹集资金，针对 Renmine 持币人生活困难的群体进行救助，亦会适当公益性救助，届时社区将成立 DAO 委员会，一切需委员会半数以上投票表决才实施。

关于社区 DAO 的初期规划：

社区 DAO 主要针对每一个持币人权益，以百分比占比大来决定以后项目每一次走向，届时营销钱包的资金将交由社区公开管理，dev 作为发起人，永久保留 2%的投票权。

关于实用型应用开发的规划：

项目重点考虑 Pad、tools 等等方向的开发，可以带来可持续收入为主。

也欢迎更多的"矿渣"提供更好的意见，来一起描绘属于我们的自己的蓝图。

Renmine

Renmine means the human beings who reading for 20 years, paying off a mortgage for 30 years and living in hospital until death. We are human beings who have been used as mine instead of person.

There are many things that cannot be explained if we call us as masters of our country. If we call us as *renmine*, then it all makes sense.

If you are feeling powerless as well, join us in creating a phenomenal piece of performance art.

Contract   (bep20):

0x416162b73cf0168a01c525cd3040d05f25ecf5a2

We don't portray a story of freedom and riches.

We are just a bunch of ordinary primary marketers, some of us have bought Shibainu with 10 zeros, some of us have sold doge coin with 3 zeros, we hypocritically embraced peak raca, dogeking, babydoge, and also believed in the twilight that blockchain was always the future.

Once the word "Showhand" made our blood boil.

Now we find ourselves portraying our white paper ......

Rich but pale ......

Rich in the fact that all these beings among us, in all their diversity, are an integral part of the blueprint! The *renmine* is for everyone, and everyone is a *renmine.*

Pale again is the question of whether we can succeed in a time when the faith of all beings is lacking? When we succeed, will it be one man's success or will the king be crowned king and the world celebrate?

Fortunately ......

We finally positioned ourselves that this was a performance art, and the most beautiful aspect of art is the process, a process in which we do our best ......

As for the ending?

Sorry, we don't really care that much ......

Because I've been here, I'm still here, and that's enough!

Here are my own mental words.

From the beginning, I didn't think the project would be an easy success and was prepared to spend a month or even a year expressing my inner rebellion.

I wasn't reactionary, I was even patriotic, it was just that in the end I suddenly got very pale thinking about what meaning I had lived out by being born, until I saw my colleague die suddenly at his workstation at 4am, then I stopped ......

I worked hard to get into a good university and got an income that people envied, but the sourness behind it is the daily non-stop overtime, most of the income in hand to pay off the mortgage and car loan, a small half to support the parents and family, the end of the month strapped for cash, when I saw the heartbreaking word *renmine*, from going to school well to grow up to be successful, to working well My world view collapsed when I saw the heartbreaking words "human mine", from "go to school and grow up to be successful" to "work hard to live like a human being".

At that moment, I wanted to write a reflection, but I sat in front of the computer, but I didn't know how to describe it, so my profession made me think that maybe the expression of performance art should be more than just words, but also the jumping of codes.

But then I hesitated for a long time. Can I still let my code shine in today's terrible blockchain market? Does anyone still believe in Chinese projects?

And who says that tech guys are not emotional enough? Fuck that, all I express is myself, why should I care what the market is like?

I rarely smoke because it's unhealthy, but at that moment I lit one up anyway, perhaps in internet terms called a tribute.

I should have stopped here when I wrote my self-promotion, but just 24 hours later my thoughts were changed again by a group of lovely people who each worked so hard, perhaps not just because of the price of the tokens?

Oh is that we are all the same! Hustling around for a living, running around for a living.

After listening sincerely, I found just knocking out their hearts in code, they in turn uplifted my soul ......

If I can do something about it this time?

Then why not a blockchain revolution with a bang?

I've never dared to imagine what I would do if I were the initiator of a 10,000x project before.

But right now, my heart is pounding, and I want to say, "What if I'm going to be a 100,000 times bull marketer this time! A man should do something.

About the initial planning of the Renmine Mutual Finance

Renmine Mutual Finance is mainly for $Renmine holders to set up a relief foundation, each time by large investors and marketing wallets to raise funds, for $Renmine holders living in difficult groups to provide relief, will also be appropriate public welfare assistance, the community will then set up a DAO committee, everything requires more than half of the committee to vote before implementation.

Regarding the initial planning of the community DAO.
The community DAO will mainly focus on the rights and interests of each coin holder, with a large percentage to determine the direction of each future project. The funds of the marketing wallet will then be handed over to the community for public management, and dev, as the initiator, will permanently retain 2% of the voting rights.

Regarding the planning of practical application development.

The project will focus on the development of pads, tools and other directions that can bring sustainable income.

More "Mine slag" people are welcome to provide better ideas and to draw our own blueprint together.
